Expressions

Expression	Example	Description
!!	sudo !!	Last command (<code>sudo !!</code>)
!*	vim !*	Last command's parameters (<code>vim !*</code>)
!^		Last command's first parameter
!\$		Last command's last parameter
!?!ls <tab>	sudo !?mv <tab>	Command and params of last <code>ls</code> command
Change default shell		Params of last <code>ls</code> command
<pre>chsh -s `which zsh`</pre>		
Last modified 14 days ago		

Process Substitution

Expression	Example	Description
<(COMMAND)	grep "needle" <(curl "https://haystack.io")	Replace argument with named pipe/FIFO (read-only) with command output
Also see (COMMAND)	vim =(curl "https://haystack.io")	Replace argument with file (writable) containing command output
Bash cheatsheet		
Zsh is mostly compatible with Bash, so most everything in Bash's cheatsheet also applies.
